

# Руководство по установке приложения «Пожарный сторож»

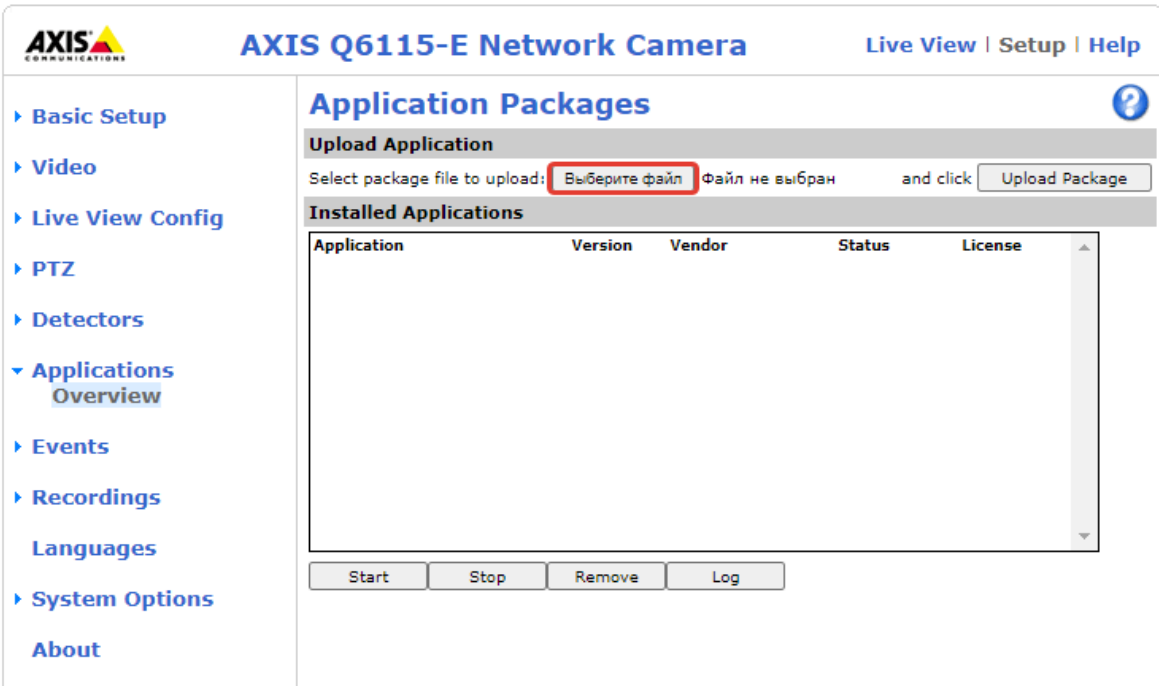

Для установки приложения «Пожарный сторож» необходимо:

- 1) Перейти в веб-интерфейс камеры;
- 2) В меню выбрать пункт Applications / Приложения;

The screenshot shows the web interface for the AXIS Q6115-E Network Camera. The top navigation bar includes the AXIS logo, the camera model name, and links for Live View, Setup, and Help. The left sidebar contains a menu with the following items: Basic Setup (expanded), Instructions, 1 Users, 2 TCP/IP, 3 Date & Time, 4 Video Stream, Video, Live View Config, PTZ, Detectors, Applications (highlighted with a red box), Events, Recordings, Languages, System Options, and About. The main content area is titled 'Basic Setup' and contains introductory text about settings, a note about the IP address, and fields for Firmware version and MAC address.

- 3) Прикрепить версию файла с локального устройства для соответствующей модели камеры и нажать Upload Package / Загрузить приложение;

The screenshot shows the 'Application Packages' section of the web interface. The top navigation bar is the same as in the previous screenshot. The left sidebar menu is also the same, but 'Applications' is expanded to show 'Overview'. The main content area is titled 'Application Packages' and includes a sub-section 'Upload Application' with a text input field containing 'Выберите файл' (highlighted with a red box) and an 'Upload Package' button. Below this is an 'Installed Applications' table with columns for Application, Version, Vendor, Status, and License. At the bottom of the table are buttons for Start, Stop, Remove, and Log.

- 4) Пакет отобразится в списке после кратковременной установки. Если статус Running / Запущен, значит установленная версия соответствует модели камеры.

The screenshot shows the web interface for an AXIS Q6115-E Network Camera. The top navigation bar includes the AXIS logo, the camera model name, and links for Live View, Setup, and Help. A left sidebar contains a menu with options like Basic Setup, Video, Live View Config, PTZ, Detectors, Applications (with Overview and fireguard sub-items), Events, Recordings, Languages, System Options, and About. The main content area is titled 'Application Packages' and features an 'Upload Application' section with a file selection button and an 'Upload Package' button. Below this is a table of 'Installed Applications' with columns for Application, Version, Vendor, Status, and License. One application, 'fireguard', is listed with version 2.4-3, vendor formoza, and status Running. At the bottom of the table are buttons for Start, Stop, Remove, and Log.
